

## LED High Bay & Low Bay

The **Brighter** Look that **Lasts**

Introducing technologically advanced LED upgrades by Qnuru for all existing high & low bay light fixtures. Keep your housing, discard the traditional energy-sucking bulb and ballast, and save 60% to 85% with our revolutionizing Vector Sustainab**LED**esign product line.

### Features and Benefits

- Eliminate the need for a full-scale replacement project, which can be a dangerous and expensive process for high bay lights.
- Decrease energy consumption, lengthen the light bulb's lifetime, improve robustness, and have more directional controllability.
- Increase green business practices with Qnuru's Universal Lighting Control Processor (ULC), which allows for a seamless transition from grid to solar power sources as well as dimming, timing, and motion detection capabilities.
- Increase visibility and safety, which is critical for any type of industrial or commercial work environment, including warehouses and manufacturing plants.

### Pick Your Vector Light Bulb

To select the best light bulb for your building's work environment, determine its existing wattage, size of the light housing and desired lumen output. The modular design and Universal Mounting Plate of Vector products also allows customers to fit any bulb into most fixtures.

## LED High Bay & Low Bay

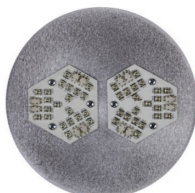

The **Brighter** Look that **Lasts**

Below is a partial list of common lighting manufacturers and their model numbers that Qnuru upgrades to LED using its Vector light bulbs. Our experienced sales team offers multiple combinations of light bulbs to satisfy your warehouse lighting needs, whether it be a certain light output, energy savings or both. Additionally, the versatility of Vector light bulbs allows for any of them to be installed into an existing fixture. Our customers order different bulbs in various quantities to create a unique lighting environment for their business.
