

LED Parking Light

The **Brighter** Look that **Lasts**

Introducing technologically advanced LED upgrades by Qnuru for all existing parking light fixtures. Keep your pole and light box, discard the traditional energy-sucking bulb, and save 60% to 85% with our revolutionizing Vector SustainabLEDesign product line.

Features and Benefits

- Eliminate the need for a full-scale replacement project, which can be an extremely long and expensive process for parking lights.
- Decrease energy consumption, lengthen the light bulb's lifetime, improve robustness, and have more directional controllability.
- Increase green business practices with Qnuru's Universal Lighting Control Processor (ULC), which allows for a seamless transition from grid to solar power sources as well as dimming, timing, and motion detection capabilities.
- Increase security which is a critical criteria for any type of parking lot light, including parking lots for car dealerships, retail stores and Industrial companies.

Pick your Vector Light Bulb

To select the best light bulb for your parking light's surrounding environment, determine its existing wattage, size of the light box and desired lumen output. The modular design of Vector products also allows customers to integrate two or more light bulbs in a fixture for those that desire a specific light output and distribution pattern.
